

AMENDMENTS TO THE ABSTRACT

Please revise the abstract on page 27 of the application as follows:

~~The invention relates to a~~ A process for manufacturing composite sheets in which includes steps of:

- continuously depositing a web of yarns, in the form of a mat of continuous yarns, a woven, a knit or an assembly of continuous non-interlaced yarns, ~~is continuously deposited on a moving substrate. this web comprising at least one organic material and at least one reinforcing material;~~

- depositing a powder of an organic material capable of forming a coating layer under the action of heat ~~is deposited on~~ at least one side of said web;
- heating the web coated with the powder ~~is heated to~~ a temperature sufficient to melt the powder;
- compressing and cooling the web ~~is compressed and cooled~~ so as to form a composite strip; and
- cutting the strip ~~is cut in~~ the form of sheets or ~~wound~~ winding the strip up on a rotating support.

~~The subject of the invention is also an installation for implementing the process and the products obtained.~~
